ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Information at June 30, 2002 and 2001 and for the three and six months ended June 30, 2002 and 2001 is unaudited)

Note 1. Organization

Allied Capital Corporation, a Maryland corporation, is a closed-end management investment company that has elected to be regulated as a business development company ("BDC") under the Investment Company Act of 1940 ("1940 Act"). Allied Capital Corporation ("ACC") has a subsidiary that has also elected to be regulated as a BDC, Allied Investment Corporation ("Allied Investment"), which is licensed under the Small Business Investment Act of 1958 as a Small Business Investment Company ("SBIC"). In addition, ACC has a real estate investment trust subsidiary, Allied Capital REIT, Inc. ("Allied REIT"), and several subsidiaries which are singlemember limited liability companies established primarily to hold real estate properties. In April 2001, ACC established a subsidiary, A.C. Corporation ("AC Corp"), which provides diligence and structuring services on private finance and commercial real estate transactions, as well as structuring, transaction, management and advisory services to the Company, its portfolio companies and other third parties.

Allied Capital Corporation and its subsidiaries, collectively, are hereinafter referred to as the "Company."

In accordance with specific rules prescribed for investment companies, subsidiaries hold investments on behalf of the Company or provide substantial services to the Company. Portfolio investments are held for purposes of deriving investment income and future capital gains. The Company consolidates the results of its subsidiaries for financial reporting purposes. The financial results of the Company's portfolio investments are not consolidated in the Company's financial statements.

The investment objective of the Company is to achieve current income and capital gains. In order to achieve this objective, the Company invests primarily in private companies in a variety of industries and non-investment grade commercial mortgage-backed securities ("CMBS").

Note 2. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation. Certain

reclassifications have been made to the 2001 balances to conform with the 2002 financial statement presentation.

The accompanying unaudited consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information. Accordingly, the interim financial information does not include all of the information and footnotes required by GAAP for complete consolidated financial statements. In the opinion of management, the unaudited consolidated financial statements of the Company included herein contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position of the Company as of June 30, 2002 and December 31, 2001 and the results of operations for the three and six months ended June 30, 2002 and 2001, and changes in net assets and cash flows for the six months ended June 30, 2002 and 2001. The results of operations for the three and six months ended June 30, 2002 are not necessarily indicative of the operating results to be expected for the full year.

25

ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 2. Summary of Significant Accounting Policies, continued

The private finance portfolio is presented in three categories — companies more than 25% owned which represent portfolio companies where the Company directly or indirectly owns more than 25% of the outstanding voting securities of such portfolio company and, therefore, are deemed controlled by the Company under the 1940 Act; companies owned 5% to 25% which represent portfolio companies where the Company directly or indirectly owns 5% to 25% of the outstanding voting securities of such portfolio company or where the Company holds one or more seats on the portfolio company's board of directors and, therefore, are deemed to be an affiliated person under the 1940 Act; and companies less than 5% owned which represent portfolio companies where the Company directly or indirectly owns less than 5% of the outstanding voting securities of such portfolio company and where the Company has no other affiliations with such portfolio company. The interest and related portfolio income and net realized gains or losses from the commercial real estate finance portfolio and other sources are included in the companies less than 5% owned category on the consolidated statement of operations.

Valuation of Portfolio Investments

The Company, as a BDC, invests primarily in illiquid securities including debt and equity securities of private companies and non-investment grade CMBS. The Company's investments are generally subject to restrictions on resale and generally have no established trading market. The Company values substantially all of its investments at fair value as determined in good faith by the board of directors in accordance with the Company's valuation policy. The Company determines fair value to be the amount for which an investment could be exchanged in an orderly disposition over a reasonable period of time between willing parties other than in a forced or liquidation sale.

10k Wizard: SEC Filings Page 30 of 97

The Company's valuation policy considers the fact that no ready market exists for substantially all of the securities in which it invests. The Company's valuation policy is intended to provide a consistent basis for establishing the fair value of the portfolio. The Company will record unrealized depreciation on investments when it believes that an investment has become impaired, including where collection of a loan or realization of an equity security is doubtful. Conversely, the Company will record unrealized appreciation if it believes that the underlying portfolio company has appreciated in value and the Company's equity security has also appreciated in value, where appropriate. The value of investments in public securities are determined using quoted market prices discounted for restrictions on resale.

Loans and Debt Securities

For loans and debt securities, fair value generally approximates cost unless the borrower's enterprise value or overall financial condition or other factors lead to a determination of fair value at a different amount.

When the Company receives nominal cost warrants or free equity securities ("nominal cost equity"), the Company allocates its cost basis in its investment between its debt securities and its nominal cost equity at the time of origination. At that time, the original issue discount basis of the nominal cost equity is recorded by increasing the cost basis in the equity and decreasing the cost basis in the related debt securities.

Interest income is recorded on an accrual basis to the extent that such amounts are expected to be collected. For loans and debt securities with contractual payment-in-kind interest, which represents contractual interest accrued and added to the loan balance that generally becomes due at maturity,

26

ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 2. Summary of Significant Accounting Policies, continued

the Company will not accrue payment-in-kind interest if the portfolio company valuation indicates that the payment-in-kind interest is not collectible. Loans classified as Grade 4 or Grade 5 assets do not accrue interest. Loan origination fees, original issue discount and market discount are capitalized and then amortized into interest income using the effective interest method. Prepayment premiums are recorded on loans when received.

The weighted average yield on loans and debt securities is computed as the (a) annual stated interest rate earned plus the annual amortization of loan origination fees, original issue discount and market discount earned on accruing loans and debt securities, divided by (b) total loans and debt securities at value. The weighted average yield is computed as of the balance sheet date.

Page 31 of 97

Equity Securities

The Company's equity interests in portfolio companies for which there is no liquid public market are valued at fair value based on the enterprise value of the portfolio company, which is determined using various factors, including cash flow from operations of the portfolio company and other pertinent factors such as recent offers to purchase a portfolio company's securities or other liquidation events. The determined fair values are generally discounted to account for restrictions on resale and minority control positions.

The value of the Company's equity interests in public companies for which market quotations are readily available is based upon the closing public market price on the balance sheet date. Securities that carry certain restrictions on sale are typically valued at a discount from the public market value of the security.

Dividend income is recorded on cumulative preferred equity securities on an accrual basis to the extent that such amounts are expected to be collected, and on common equity securities on the record date for private companies or on the ex-dividend date for publicly traded companies.

Commercial Mortgage-Backed Securities ("CMBS")

CMBS are carried at fair value, which is based upon a discounted cash flow model that utilizes prepayment and loss assumptions based upon historical experience and projected performance, economic factors and the characteristics of the underlying cash flow. The Company's assumption with regard to discount rate is based upon the yield of comparable securities. The Company recognizes income from the amortization of original issue discount using the effective interest method, using the anticipated yield over the projected life of the investment. Yields are revised when there are changes in estimates of future credit losses, actual losses incurred, or actual and estimated prepayment speeds. Changes in estimated yield are recognized as an adjustment to the estimated yield over the remaining life of the CMBS from the date the estimated yield is changed. The Company recognizes unrealized appreciation or depreciation on its CMBS, as comparable yields in the market change and/or whenever it determines that the value of its CMBS is less than the cost basis due to impairment in the underlying collateral pool.

Residual Interest

The Company values its residual interest from a previous securitization and recognizes income using the same accounting policies used for the CMBS. The residual interest is carried at fair value based on discounted estimated future cash flows. The Company recognizes income from the residual

27

Note 2. Summary of Significant Accounting Policies, continued

interest using the effective interest method. At each reporting date, the effective yield is recalculated and used to recognize income until the next reporting date.

Net Realized and Unrealized Gains or Losses

Realized gains or losses are measured by the difference between the net proceeds from the sale and the cost basis of the investment without regard to unrealized gains or losses previously recognized, and include investments charged off during the year, net of recoveries. Unrealized gains or losses reflect the change in portfolio investment values during the reporting period.

Fee Income

Fee income includes fees for diligence, structuring, transaction services, management services and investment advisory services rendered by the Company to portfolio companies and other third parties. Diligence, structuring and transaction services fees are generally recognized as income when services are rendered or when the related transactions are completed. Management and investment advisory services fees are generally recognized as income as the services are rendered.

Deferred Financing Costs

Financing costs are based on actual costs incurred in obtaining debt financing and are deferred and amortized as part of interest expense over the term of the related debt instrument.

Derivative Financial Instruments

The Company may or may not use derivative financial instruments to reduce interest rate risk. The Company has established policies and procedures for risk assessment and the approval, reporting and monitoring of derivative financial instrument activities. The Company does not hold or issue derivative financial instruments for trading purposes. All derivative financial instruments are recorded at fair value with changes in value reflected in net unrealized gains or losses during the reporting period.

Cash and Cash Equivalents

Cash and cash equivalents include cash in banks and all highly liquid investments with original maturities of three months or less.

Dividends to Shareholders

Dividends to shareholders are recorded on the record date.

Stock Compensation Plans

The Company applies the intrinsic value-based method of accounting prescribed by Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations to account for its stock compensation plans. Under this method, the

Company records compensation expense for awards of stock options to employees only if the market price of the stock on the grant date exceeds the amount the employee is required to pay to acquire the stock.

Note 2. Summary of Significant Accounting Policies, continued

Federal and State Income Taxes

The Company intends to comply with the requirements of the Internal Revenue Code ("Code") that are applicable to regulated investment companies ("RIC") and real estate investment trusts ("REIT"). The Company and its subsidiaries that qualify as a RIC or a REIT intend to annually distribute or retain through a deemed distribution all of their taxable income to shareholders; therefore, the Company has made no provision for income taxes for these entities. AC Corp is a corporation subject to federal and state income taxes and records a provision for income taxes as appropriate.

Per Share Information

Basic earnings per share is calculated using the weighted average number of shares outstanding for the period presented. Diluted earnings per share reflects the potential dilution that could occur if options to issue common stock were exercised into common stock. Earnings per share is computed after subtracting dividends on preferred shares.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

The consolidated financial statements include investments at value of \$2,380,969,000 and \$2,329,590,000 as of June 30 2002 and December 31, 2001, respectively, (93% and 95%, respectively, of total assets). Substantially all of these investments represent investments whose fair values have been determined by the board of directors in good faith in the absence of readily ascertainable market values. Because of the inherent uncertainty of valuation, the board of directors' estimated values may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material.

Note 3. Portfolio

Private Finance

At June 30, 2002 and December 31, 2001, the private finance portfolio consisted of the following:

		2002			2001		
	Cost	Value	Yield	Cost	Value	Yield	
(\$ in thousands) Loans and debt securities Equity interests	\$1,183,308 397,704	\$1,050,752 584,507	13.9%	\$1,169,673 384,293	\$1,107,890 487,182	14.8%	
Total	\$1,581,012	\$1,635,259		\$1,553,966	\$1,595,072		

Private finance investment activity principally involves providing financing through privately negotiated long-term debt and equity investments. Private finance investments are generally structured as loans and debt securities that carry a relatively high fixed rate of interest, which may be combined with equity features, such as conversion privileges, or warrants or options to purchase a portion of the portfolio company's equity at a pre-determined strike price, which is generally a nominal price for warrants or options in a private company. Private finance investments are generally issued by

29

ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 3. Portfolio, continued

privately-owned companies and are generally illiquid and subject to restrictions on resale or transferability.

Loans and debt securities generally have a maturity of five to ten years, with interest-only payments in the early years and payments of both principal and interest in the later years, although debt maturities and principal amortization schedules vary. At June 30, 2002 and December 31, 2001, approximately 97% and 98%, respectively, of the Company's private finance loan portfolio was composed of fixed interest rate loans.

Equity interests consist primarily of securities issued by privately-owned companies and may be subject to restrictions on their resale or may be otherwise illiquid. Equity securities generally do not produce a current return, but are held in anticipation of investment appreciation and ultimate gain on sale.

At June 30, 2002 and December 31, 2001, the Company had an investment at value totaling \$251,920,000 and \$227,449,000, respectively, in Business Loan Express, Inc. ("BLX"), a small

business lender that participates in the SBA Section 7(a) Guaranteed Loan Program. The Company owns 94.9% of BLX's common stock. As the controlling shareholder of BLX, the Company has provided an unconditional guaranty to the BLX credit facility lenders in an amount up to 50% of the total obligations (consisting of principal, accrued interest and other fees) on BLX's 3-year unsecured revolving credit facility for \$124,000,000. The amount guaranteed by the Company at June 30, 2002 was \$48,100,000. This guaranty can be called by the lenders only in the event of a default by BLX. BLX was in compliance with the terms of its credit facility at June 30, 2002. In consideration for providing this guaranty, BLX will pay the Company an annual guaranty fee of approximately \$3,100,000 in 2002. BLX is headquartered in New York, NY. The Company has also provided two standby letters of credit in connection with two term securitization transactions completed by BLX in the second quarter of 2002 totaling \$10,550,000.

At June 30, 2002 and December 31, 2001, the Company had an investment in The Hillman Companies, Inc. (formerly SunSource, Inc.) totaling \$131,012,000 and \$97,227,000 at value, respectively. The Company owns 93.2% of Hillman's common stock. Hillman is a leading manufacturer of key making equipment and distributor of key blanks, fasteners, signage and other small hardware components and operates in multiple channels of the retail marketplace such as hardware stores, national and regional home centers and mass merchants. Hillman's primary operations are located in Cincinnati, Ohio.

At June 30, 2002 and December 31, 2001, the Company had an investment in WyoTech Acquisition Corporation at value totaling \$77,008,000 and \$60,388,000, respectively. The Company owned 91.35% of WyoTech's common stock. WyoTech is a proprietary trade school and its primary operations are in Laramie, Wyoming. WyoTech was sold on July 1, 2002. See Note 13 for the subsequent event.

30

ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Note 3. Portfolio, continued

At June 30, 2002 and December 31, 2001, Grade 4 and 5 loans and debt securities that were not accruing interest at value were as follows:

	2002	2001
(in thousands)		
Companies more than 25% owned	\$ 721	\$ 930
Companies 5% to 25% owned	899	2,848
Companies less than 5% owned	103,562	89,966
		······································
	\$105,182	\$93,744
	Marandal Marandal	

Included in Grade 4 and 5 loans and debt securities not accruing interest were assets valued at

\$8.9 million at June 30, 2002 and December 31, 2001 that represented receivables related to companies in liquidation. In addition to Grade 4 and 5 assets that are in workout, we may not accrue interest on loans to companies that are more than 50% owned by the Company if such companies are in need of additional capital and, therefore, the Company may defer current debt service. Loans and debt securities to such companies totaled \$61,331,000 at value at June 30, 2002.

The industry and geographic compositions of the private finance portfolio at value at June 30, 2002 and December 31, 2001 were as follows:

	2002	2001
Industry		
Consumer products	30%	28%
Business services	24	22

Note 3. Portfolio, continued

Commercial Real Estate Finance

At June 30, 2002 and December 31, 2001, the commercial real estate finance portfolio consisted of the following:

		2002			2001	
	Cost	Value	Yield	Cost	Value	Yield
(\$ in thousands)						
CMBS	\$589,558	\$613,423	14.8%	\$582,553	\$582,553	14.8%
Loans	61,890	62,001	7.9%	76,120	79,597	7.7%
Residual interest	69,341	69,042	9.3%	70,179	69,879	9.4%
Real estate owned	3,451	1,244		3,784	2,489	
Total	\$724,240	\$745,710		\$732,636	\$734,518	

CMBS

At June 30, 2002 and December 31, 2001, the CMBS portfolio consisted of the following:

	2002			2001		
	Cost	Value	Yield	Cost	Value	Yield
(in thousands)	<u></u>					****
CMBS bonds	\$537,025	\$560,890	14.6%	\$558,346	\$558,346	14.7%
Collateralized debt obligations	52,533	52,533	17.2%	24,207	24,207	16.9%
m - 1	#Z00 CC0	0.612.422		0503 553	P693 663	
Total	\$589,558	\$613,423		\$582,553	\$582,553	

CMBS Bonds. At June 30, 2002 and December 31, 2001, the CMBS bonds, which were purchased from the original issuer, consisted of the following:

	2002 2001	
(\$ in thousands)	**************************************	•••
Face	\$1,181,989 \$1,170,272	
Original issue discount	(644,964) (611,926)	
Cost	\$ 537,025 \$ 558,346	
Value	\$ 560,890 \$ 558,346	
Yield	14.6% 14.7%	

The non-investment grade and unrated tranches of the CMBS bonds in which the Company invests are junior in priority for payment of interest and principal to the more senior tranches of the related CMBS bond issuance. Cash flow from the underlying mortgages generally is allocated first to the senior tranches, with the most senior tranches having a priority right to the cash flow. Then, any remaining cash flow is allocated, generally, among the other tranches in order of their relative seniority. To the extent there are defaults and unrecoverable losses on the underlying mortgages resulting in reduced cash flows, the Company's most subordinate tranch will bear this loss first. At June 30, 2002, the Company's CMBS bonds were subordinate to 92% to 97% of the tranches of bonds issued in various CMBS transactions. Given that the non-investment grade CMBS bonds in which the Company invests are junior in priority for payment of principal, the Company invests in these CMBS bonds at an approximate discount of 50% from the face amount of the bonds.
